

Please do not limit XM radio for the following reasons1) It offers me service that i can not get locally

2) There are two satellite service that compete with each other

3) Satelitte radio grows in poularity because the radio stations chose to appeal to the large segments of pop while satlite radio serves many small niche groups that local radio choses not to compete for. Locally there are very few choices for me.

4) Taking away satlitte radio drives people to use other prerecorded services . People will continue to excersie the choices that new technology offers

5) Attempts to stop change brought on by new technology fails counter to our free enterpise american way. Creativity and freedom to chose is what makes our country great
